Git

PROFESSIONAL PROFILE

I am a Computer **Engineering** student at UPM, and a self-taught developer in web technologies.

On a day-to-day basis, I develop from the **Frontend** part mainly with Html, CSS, Javascript and React.js, although I can combine it with other technologies to adapt to each project. On the **Backend** side my suite of tools consists of Node.js, Express and MongoDB.

ABOUT ME

I am passionate about new technologies, computing and especially **Blockchain**. I love challenges and working on interesting ideas. I spend a lot of my time learning about technology and I am learning how to develop **Smart Contracts** with Solidity.
